

AUM UVC GERMICIDAL IRRADIATION CART

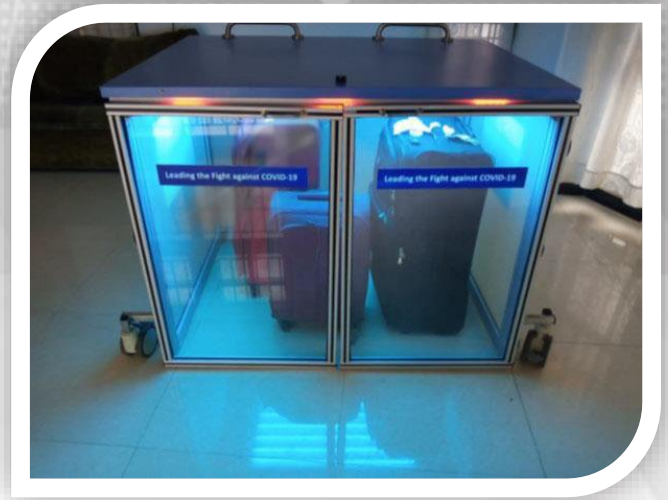

AUM UVC cart is designed to fight against COVID-19. It disinfects traveling luggage quickly. The Intensity is more and delivers the lethal dosage in a very short time. It also produces ozone which deodorizes and also disinfects the luggage. It is designed in such a way that the operator does not handle the luggage. He moves the cart over the luggage close the door and disinfect. Separate small compartment to disinfect valet, phone or other small items

Very useful before loading the check-in luggage and also after collecting from the belt.

In a hotel lobby, the guest luggage can be disinfected before check-in.

UVC CART

AUM UVC GERMICIDAL IRRADIATION CART
